Republic's Single Point II Athletic Lockers

Standard Features:

Material: Door – 14 ga. mild cold rolled steel with 16 ga. welded channel reinforcement (tiered lockers only).
 Body – 16 ga. mild cold rolled steel. (18 ga. backs).

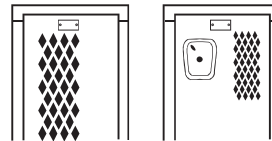

Assembly: Knocked down (KD), assembled with rivets or nuts and bolts.

Hinge: Full loop, 2" 5-knuckle hinges nested in door slot; welded to frame and double-riveted to door.

Handle: Drawn stainless steel recessed cup with integral finger pull and padlock hasp. Cup punched to accept padlock or built-in locks. Meets ADA requirements for accessibility.

Latching: 11 ga. frame hook engages recessed handle pocket. For maximum security, Republic recommends use of a padlock.

Ventilation: Door (tiered) – large diamond perforations; Doors (box) – small diamond perforations;
 Side – Large diamond perforations;
 – solid sides can be requested for either row ends or all sides.

Optional Features:

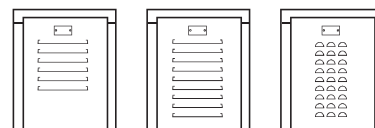

Material: Door – 14 ga. galvanized steel; 16 ga. channel reinforcement on box lockers.
 Body – 16 ga. galvanized steel; stainless steel bottoms.

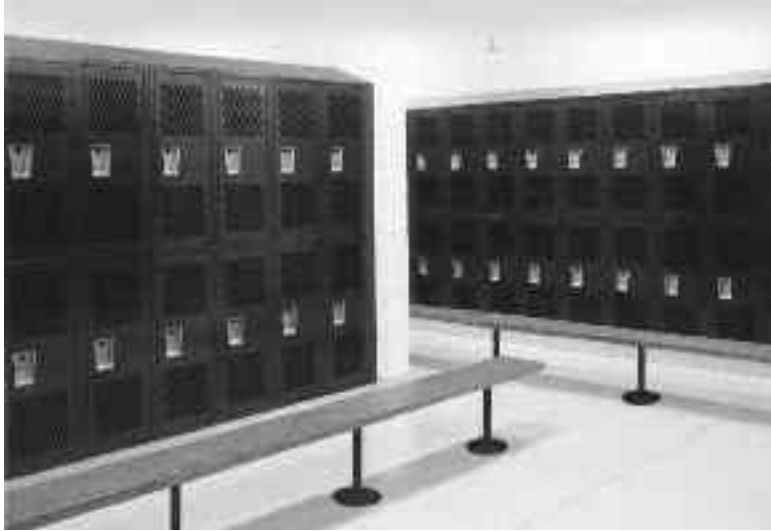

Assembly: Knocked down (KD) assembled with Keps nuts and bolts; welded assembly (backs are 16 ga.)

Hinges: Continuous "piano" style hinge.

Handle: Available without padlock hasp.

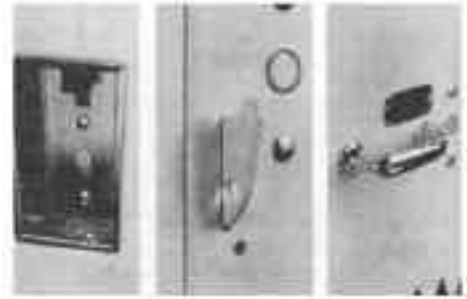

Ventilation: Louvers; full louvers; mini-louvers.

Heavy Duty Ventilated and All Welded Ventilated Lockers are designed to meet the harsh requirements of an athletic room environment. Built to last, these lockers feature rugged, 14 gauge steel doors, a heavy gauge body and our premium paint finish throughout. Attractive diamond perforations ensure maximum ventilation, and Republic's Latch Guard system provides powerful protection against tampering. The HDV and AWW athletic lockers offer clean, contemporary appearance, reliable security and rugged, heavy duty construction for years of trouble free performance.

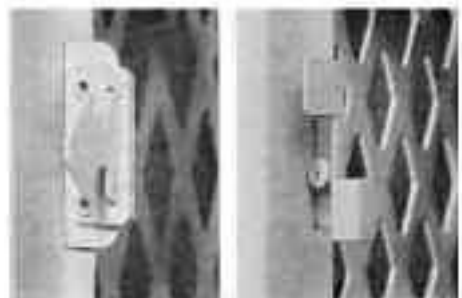

- Extra heavy 14 gauge doors
- Heavy duty 16 gauge steel body parts (backs are 18 gauge).
- Concealed Quiet Lock Bar system with Latch Guard
- Box lockers feature the Spring Latch system that engages automatically when door is closed
- Diamond perforations for maximum ventilation or mini-louvers for added strength and security
- Stainless steel recessed handles
- Continuous vertical door strikes
- Full-flanged, channel-edged doors
- Hinges double-riveted to doors
- Strong, welded frame assembly
- Riveted or bolted assembly (HDV only)

The stainless steel Recessed Handle with lifting trigger can accommodate built-in or padlock type locks. Box lockers feature a Spring Latch that automatically engages locker frame hooks for a secure, durable connection. Tiered athletic lockers can also be equipped with a Turn Handle that provides three-point latching at the top, bottom and side frame of the locker.

Diamond Perforations allow unrestricted air flow through locker. Perforations are punched, not stretched, resulting in components that are stronger than expanded metal type construction. Mini-louvers provide ventilation while concealing the locker's contents.

Heavy Gauge Frame Hooks are welded to tier and box locker door frames. Frame hooks on both lockers feature a rubber latch guard silencer that prevents tampering and break-ins.

The All Welded Ventilated Locker incorporates the superior design features of the HDV Locker. In addition, it utilizes a unique, one piece back/side design for added strength and improved grouping alignment. The AWW Locker is shipped pre-assembled and ready to install.

MVP ATHLETIC LOCKERS

A TEAM REQUIREMENT

ATHLETIC LOCKERS

D Athletic Lockers

E ADA Compliant

The "Most Valued Player" in our athletic locker series, the MVP is the biggest, strongest storage locker we offer. This open-front design accommodates bulky uniforms and athletic equipment. Closet-type storage area is combined with an upper shelf for hats, gloves and smaller items. An optional locking compartment and foot locker provide additional

U of M – Duluth, Football Locker Room

secured storage. Heavy-gauge steel body components and a premium paint finish guarantee durability in such areas as high school locker rooms, sports team rooms and stadium locker room facilities. Police and fire departments also specify the MVP for uniform and equipment storage. MVP lockers are available in bolted, riveted or welded assembly.

ADA LOCKERS

ADA Compliant Lockers

ADA Compliant Lockers meet the requirements of the American with Disabilities Act for accessibility and usability. With an adjustment to the shelf location, Republic lockers with recessed handles meet the operation and reach needs of the user. Lockers should be placed in an area to allow full door swing and wheelchair turning ability. ADA Compliant Benches (24" x 48") are also available. (Locks shown on page 15)

The DigiLock T-30

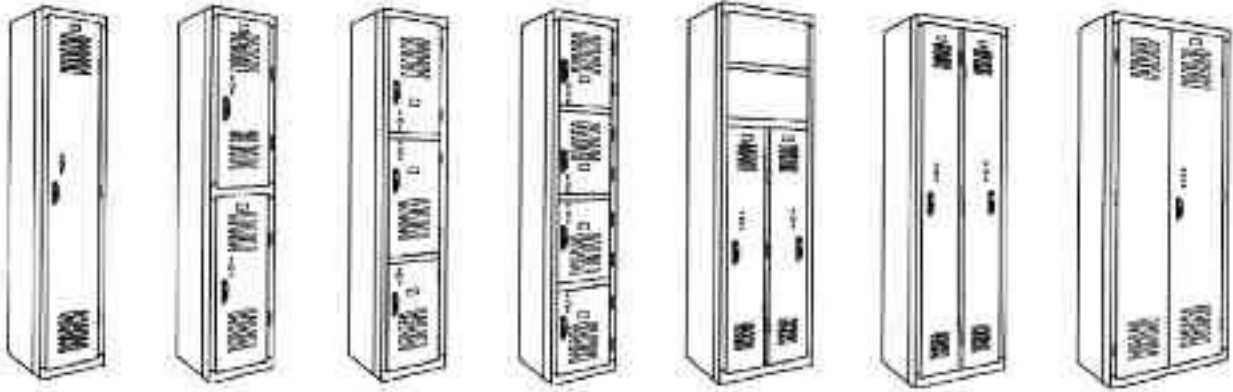

The DigiLock line of battery-powered button key locks sets the industry standard for usability and easy functionality, comprising the only line of locks on the market today that fully complies with the American With Disabilities Act guidelines set by the U.S. Access Board. The DigiLock T-30 is designed for lockers with handles and a vertical locking bar. Since the T-30's bolt can slide horizontally left or right this model easily integrates with new OEM lockers or retrofits into existing lockers.

Federal guidelines require that five percent of a school's lockers be ADA compliant.

LOCKER TYPES & OPTIONS

A CONFIGURATION FOR YOUR APPLICATION

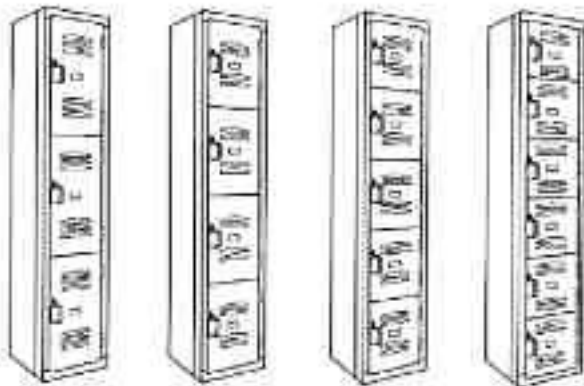

A. Single Tier B. Double Tier C. Triple Tier D. Four Tier E. Two Person F. Duplex G. Double Door

- A. Single Tier is our most popular general purpose locker. Full height storage for long articles. Includes hat/book shelf 9" down (12" down on 9" wide lockers).
- B. Double Tier accommodates two users in the space of one single tier.
- C. Triple Tier provides more openings in less space. Ideal for smaller articles.
- D. Four Tier provides exceptionally safe, secure personal storage in an efficient configuration. Ideal for small items and books.

- E. Two Person provides long article height in less floor space. Locking device in coat compartment opens full width. private hat/book compartment above. Coat rods supplied with 18" and 21" deep lockers.
- F. Duplex provides efficient long article storage when available floor space is limited. Includes hat/book shelf 12" down on 60" height and 18" down on 72" height. Coat rods supplied with 18" and 21" deep lockers.
- G. Double Door configuration is perfect for 24" wide lockers where door swing space is limited. Includes hat/book shelf 9" down. Coat rods supplied with 18", 21" and 24" deep lockers. Many custom options are available.

All lockers shown above come with pre-locking, two-point or three-point latching system, coat hooks (except Four Tier), and number plates. All Republic lockers have provisions for padlock attachment and built-in locks.

3-High 4-High 5-High 6-High
